Onboarding page

Explain how it works:

With our provided equipment and services, we will construct a minimal invasive environment that allows you to create holographic illusions of yourself or AI generated humans: With the intent of deterring and discouraging unwanted attention from your home.

Signing up:

Enter your personal information. (For personalization and account creation purposes)

- Name
- Age
- Email

Enter information about house.

- Address (maybe it'll auto configure house off of zillow or other database
- Size of home (might autofill from prev input)
- Windows (might need to scan or autofill from input 1)

Pay (includes maintenance, service, and materials)

→

Start / Setup

Set schedule of when you're not home.

Enter additional information.

- (Can do later)
Scan your face to add to the storage of what the decoy will do
- Gives you a huge sample of AI Generated humans that will be used. You will get a unique selection that you can choose to match your family or traditions

↙

Everyday use

LOOK: Similar to the lightbulb app we made.

Menu showing all homes, all windows/rooms.

↓

Use the lightbulb look. Tools and features to turn on and off, set schedule etc.

INCLUDE:
Things like view what the decoy is doing.
